

Assignment-1

Suppose you own a Mobile Retail Shop. Create a report in tableau worksheet showing sale analysis for the month of November(Refer [Mobile Retail Store Data](#) provided in your LMS)

- Create visualization to differentiate between different mobile brands available in your store
- Create joints that includes different variants in mobile phone available in your store and minimum price for each brand
- Customize your visualization showing dual axis for each brand and their variants
- Edit relationship in a separate worksheet show data blending form two different sources(take any two data set form Mobile Retail Store Data)
- Create a generalized visualization that will provide you insights about which mobile brand is sold best and what can be new brands that you may include in your store?
