# Trend Lines- Steps to Create a Residual Plot
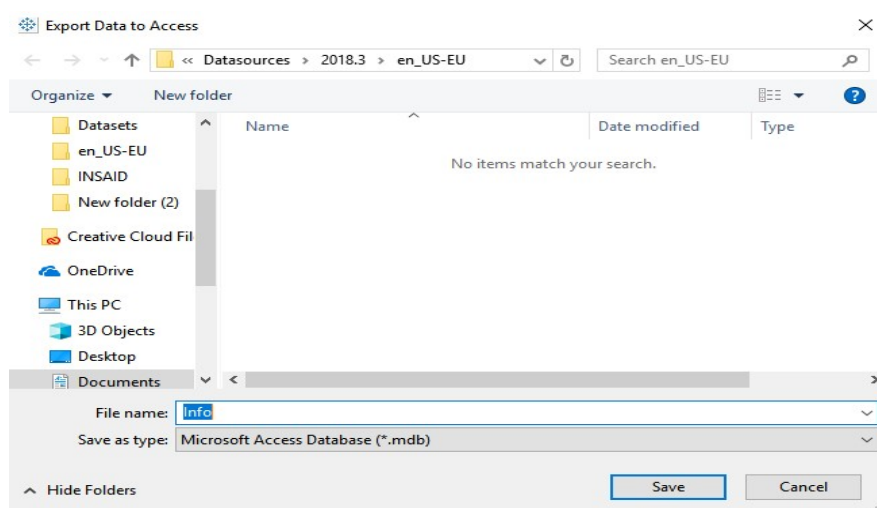

Steps to Follow:

1. After creating a trend line.
   Go to worksheet→Export→Data

2. Save the file in .mdb Format

3. Select "Connect after export" option and Click "Ok".

4. Now, plot the residuals against the exploratory variable to check if the residuals follow Random Normal distribution along the zero line (If that is not the case then the model is not a good fit).
